

Due to increasing changes in vision healthcare we ask that you read this information, sign and date. Some insurance companies outsource their eye care which means they have a whole separate company that covers their eye care. Your company may have chosen to use this choice because they can offer routine eye exams on their plans. For this reason, you may want to contact your insurance company and find out if their plan requires you to seek a practice that has been credentialed with that company in order to receive payment. In most cases, you will be seeing an Optometrist, not an Ophthalmologist. Medicare does not cover routine exams or refractions for glass prescriptions. There are only a few companies that pay for routine vision exams for glasses, contact lens evaluations or contact lens. We are contracted for medical conditions on BCBS/NC, Unitedhealthcare, CIGNA Accordia, Healthcare Savings and Medicaid. If you have one of the aforementioned plans that we are credentialed with, and if your visit is filed through the home plan, we will file the visit for you. Some companies do allow you to see anyone and will pay, but we have no way of confirming that by your insurance card. If you decide to see us for routine care that is not covered, we will collect at the time of service & provide you with a receipt that you can file for possible reimbursement.

I understand that I will be responsible for full payment for services that I will receive from CCFEA that my insurance company will not cover. I have chosen to see Dr. Kelly and pay for these services myself.
